Mitja Sadar**Languages:** Slovenian, English, Croatian, Serbian, **Spanish, German, French, Dutch****EMPLOYMENT RECORD****Intelligence Information Systems (C6 Intelligence) June 2009 – present**
AML Research Analyst (Western Europe & Scandinavia)

- Initial preparation of AML (Anti Money Laundering) research strategy
- Systematic research of politically exposed people for the purpose of AML
- Ad hoc AML research on profiles as requested by clients
- Monitoring of news sources relevant to prevention of Money Laundering
- Preparation of weekly and monthly plans and progress reports
- Managing a team of 2 assistants

Key achievement: After being with the company for 2 months, a client requested a large AML check of the profiles for France. I was put in charge of the whole team and had to manage the workflow in order to cover the most profiles within 4 days. The management set out initial expectations, which a team under my leadership managed to beat comfortably by a large margin, thus impressing everyone. After that project, I was given responsibility for wider region and was assigned two assistants to help me cover the added workload. I have since overseen a large improvement of systematic coverage of AML relevant profiles in my region.

Middlefin Limited Jan 2008 – Sept 2008
Property Analyst

- Analysis of the market
- Preparation and design of reports
- Communication with information sources (Estate Agents)
- Creation of MS Excel models (sensitivity analysis, extrapolation)
- Gauging of market sentiment

Key achievement: Creation of MS Excel model that cut down the time necessary to evaluate the property

TechTeam Global NV/SA July 2006 – Sept 2007
Communication Agent and Database Administrator

- Online research
- Communication with clients
- Preparation of reports
- Problem-solving
- Maintenance of the Database
- Coordinating Database Development
- Managing a team of programmers

Key achievement: After I requested a new feature for the Database, the programmers informed me that it can not be done. When I did an online research, I have found a comparable solution. I requested a meeting with the programmers, showed them the comparable solution and after 3 weeks, the new feature for our Database was ready.
